

The TETENAL lab auxiliaries offer an unique variety and selection.

Cloths

Antistatic lab polishing cloth

Premium quality impregnated lint free cloth for eliminating static charge, e.g. on films, plastic surfaces, carriers. Provides an antistatic dust repellent coating. Size: 28 x 37 cm, colour: orange Art. No. 101312

Art. No. 101312

Art. No. 101313

Cleaning Cloth

Special purpose lint free, non impregnated cloth. Recommended for use with FILM CLEANER SPRAY for removing water stains, finger prints and grease marks. Size 35 x 30 cm, colour: yellow Art. No. 101313

High Tech Optic Cloth

Special purpose high-tech microfibre fabric for gentle cleaning of optical lens systems. Washable up to 60°C. Size: 20 x 25 cm, colour: white Art. No. 101315

Art. No. 101315

Art. No. 101308

Antistatic polishing cloth

Impregnated cloth for eliminating static charge, e.g. on films, plastic surfaces, carriers. Standard quality. Provides an antistatic dust repellent coating. Size: 24 x 30 cm, colour: blue Art. No. 101308

Sprays

Anti Reflex Spray

„For use on subjects“. The Anti Reflex spray eliminates interfering reflections by matting the subject to be photographed and can be easily removed afterwards. Free from CFC's. 400 ml can Art. No. 105195

Art. No. 105195

Art. No. 105202

Camera Varnish Spray

Deep matt, superfine pigment, special lacquer. Perfect for minor repairs to cameras, lenses, optical equipment, etc. Free from CFC's. 200 ml can. Art. No. 105202

Anti Dust Professional

The large can for professional use also comes complete with a spray valve and separate tube. Yield: approx. 125 litres of compressed gas. Free from CFC's. 500 ml can Art. No. 103043

Art. No. 103043

Art. No. 103030

Anti Dust Spray

High compressed gas for removing dust from film carriers, optical equipment and film materials. With integral spray valve and additional nozzle. Capacity: approx. 50 l gas Free from CFC's. 200 ml can Art. No. 103030

Antistatic Spray

Surfactive agent to eliminate and prevent static electricity on metal, glass, plastic, e.g. on machines, equipment, films and foils. The finely dosed solvent evaporates immediately so you don't have to polish with a cloth. A very thin layer of the antistatic agent is left on the surface which has no negative chemical or optical effects on the film material. Free from CFC's. 400 ml can Art. No. 105194

Art. No. 105194

Art. No. 101638

Anti-Newton Spray

Prevents the formation of Newton's rings when scanning films. Main field of use: professional drum scanners. The Anti Newton Spray is easily removed after scanning with Tetenal Film Cleaner. Free from CFC's. 200 ml can Art. No. 101638

Light Protecting Varnish Spray, glossy/matt

Light, heat and moisture gradually attack and dissolve the pigments in colour photos over time. The consequence: the photos slowly become faded or develop spots. TETENAL light stabiliser spray offers effective protection: thanks to its very high share of UV absorbers it converts the UV radiation in light that destroys the pigments into energetic light. Simply spray on and the transparent lacquer film reliably seals the surface of the photo. Laboratory tip: Only use the glossy version for ink jet papers such as TETENAL spectra jet. Free from CFC's. 400 ml can Art. No. 105190/105192

Art. No. 105190

Art. No. 102216

Spray Adhesive Super

This special adhesive was exclusively developed for the imaging sector and is ideal for the fast and flexible laminating of photos, posters and drawings on cardboard, chip board, metal and many other materials. The elastic, waterproof adhesive layer produces a permanent bond as soon as the photos are pressed into place. Their position can be easily corrected beforehand; creases and bubbles can also be „wiped away“. Free from CFC's. 400 ml can Art. No. 102216

Protectan Spray

Protective gas. Avoids the premature oxidation of photographic baths. Prolongs the service life of concentrates and working solutions. Easy to use: spray Protectan into partially filled bottles / canisters - the neutral, heavy gas displaces the air and thus provides lasting protection. Free from CFC's. 400 ml can Art. No. 105193

Cleaners and anti-algae agents

Film Cleaner Spray

Film cleaner spray to remove fingerprints, dust or grease spots on all types of films and display materials. Easy to use. Spray film cleaner directly onto the film and wipe over with a cleaning cloth (see Art. no. 101313) or spray onto a cotton cloth and then draw the film through your fingers. Free from CFC's. 400 ml can Art. No. 105198

Colourlab Cleaner

Efficient cleaner for stainless steel, plastic and glass. Removes tar, developer stain and other deposits. Supplied in a bottle with integral spray valve. Ideal for the „intermediate“ cleaning of colour developer racks. Very easy application: Spray on the surfaces to be cleaned, leave to take effect for a minute or two, rinse off with water. 0.5 l bottle with integrated spray head. Art. No. 103402

Film Cleaner Spray
400 ml can
Art. No. 105198

Colourlab Cleaner
0.5 l bottle
with integrated spray head
Art. No. 103402

Cleaning Strips for Film Processors

Laboratory owners know the problem: as soon as the workload eases off a little, deposits quickly accumulate on the rollers. The consequence: dirty or even scratched films. Cleaning strips from Tetenal have the remedy: simply stick the strip onto the leader card and run through the developer before the start of production - the special coating attracts dirt and frees the rack rollers from deposits. Size: 61 x 400 mm, pack of 20 strips. Art. No. 103072

Cleaning Strips for Film Processors
pack of 20 strips
Art. No. 103072

Algenex Plus
Available in the sizes 1 l and 5 l
Art. Nr. 104571 / 104575

Algenex Plus

Biocide for B&W washtanks. Prevents microbiological slime and formation of algae. Keeps tanks clean. Dosage 1,5 - 3 ml per litre water. Not suitable for colour processes. Add at the end of the day. Available in the sizes 1 litre and 5 litres. Art. No. 104571/104575

Algenex Colour

Broad-spectrum biocide. Prevents microbiological growth in wash tanks of colour processes. Also to be used as an additive for Super Stabilizers in colour processes. Dosage: 1,5 - 3ml per litre water or Super Stabilizer. Add to the water at the end of the day - add to the Super Stabilizer always when mixing replenisher and initially to the working solution. Art. No. 104582

Algenex Tablets

Algenex Tablets are designed for photographic final wash tanks in B&W and colour processes. It efficiently prevents microbiological growth and even reduces existing bio slime. Active chlorine is gradually released thanks to the depot effect. Replace every 2-3 weeks. Not suitable for Super Stabilizer / Stabilizer and intermediate wash tanks of colour processes. 10 tablets of 20 g. Art. No. 106080

Art. No. 106080

Art. No. 103152

Super Rinse TSC tablets

Super rinse in a tablet form for minilabs such as Frontier. For 100 x 5 litres. Art. No. 103152

Processor Cleaner Monochrome

Processor Cleaner Monochrome is a special cleaner for developer- and watertanks in X-ray, B&W and PrePress. 2-part powder formula. Not suitable for Colour Developer tanks and B&W machines which are running with hydroquinone-free developers, e.g. Eukoprint Prof. AC and colour processes. Easily removes even stubborn dirt, such as silver, silver sulphide and lime. Art. No. 104010

DEV Tank Cleaner

Developer Tank Cleaner designed for B&W and Colour Processes. Easy and safe application due to 1-Part liquid formula. With neutralizer. Prescribed for B&W machines that are operated with hydroquinone-free developers such as Eukoprint Prof. AC. Pack for 2 x 5 l with neutraliser. Art. No. 104005

Art. No. 104005

Art. No. 104010

Exargent

Special liquid cleaner for the removal of fixer stains (silver sulphide), e.g. from clothes. Perfect also to clean rollers of Bleach Fix and Super Stabilizer racks. Must not be used for colour developer racks - contamination! Art. No. 101006

Organisation aids

Red Splicing Tape

High-quality, red silicon adhesive tape for leader cards that sticks perfectly to film strips and leader cards and can be removed to leave no residues. The tape withstands all chemicals, is very tenacious and guarantees easy unrolling thanks to the special coating on its rear. 19 mm x 66 m Art. No. 103241

Art. No. 103241

Art. No. 103283 / 103284 / 103285

Sleeving Material for Films

Strips of negatives need protection against dust, scratches and fingerprints - this is the most effective method: the matt, non-reflecting, anti-static sleeving material allows the films to be inserted easily. The sleeving film comes on 300 m long reels and is available alternatively as 4, 5 or 6-row strips. Art. No. 103283/103284/103285

Twin Check Labels

Duplicate laboratory numbers are the only sensible way to ensure a clear and distinctive classification of films of prints. Self-adhesive Tetenal Twin Check Labels of polyester stick firmly to the film strips and are resistant to all photographic chemicals. The labels come in packs of 4 rolls of 2500 numbers (7 x 20 mm). Art. No. 103299

Twin Check Labels
4 rolls of 2500 numbers
Art. No. 103299

Extractor Tape
16 mm x 10 m
Art. No. 103246

Extractor Tape

High-quality, black extractor tape for the quick and easy removal of films from 35 mm cartridges using film extractors and film pullers. Size: 16 mm x 10 m Art. No. 103246

Replacement filter for Fuji FRSS10

To demineralise tap water. Capacity, approx. 250 to 300 l of medium hardness water. Art. No. 103057

Replacement filter
for Fuji FRSS10
Art. No. 103057

Fixing Bath Tester
Pack with 100 test strips
Art. No. 101243

Fixing Bath Tester

For the quick and easy measurement of the silver content and pH value in b&w fixing baths. Use: dip the test strip into the fixing bath, shake off excess liquid and compare the coloured measurement field with the scale on the packaging. Restricted use in colour fix and bleach fix bath too. Pack with 100 test strips. An original Macherey & Nagel product. Art. No. 101243

Air Filter Sets for Minilabs

Air filter sets for selected minilabs such as Fuji Frontier 350, 370. The sets contain all the air filters needed for the relevant minilab. The individual air filters are marked and can be easily fitted in the correct part of the machine by following the enclosed installation instructions. We will be pleased to send you a product overview on request. Art. No. 101430, 101431, 101434, 101438, 101444

Art. No. 101430/101431/
101434/101438/101444

Art. No. 101051-101068

Chemical Filters for Minilabs

The filters are pressed from special plastic and keep chemical baths free from dirt, prevent the formation of smears and avoid a drop in contrast for colour developers thanks to their excellent absorption capacity. Replace dirty filters on a regular basis.

We will be pleased to send you a product overview on request.

Art. No. 101051 - 101068

Ink Ribbons for Minilabs

Special ink ribbons for printing on the rear of photo papers. These are available for many of the latest types of machines.

We will be pleased to send you a product overview on request.

Art. No. 101415 - 101423, 101426

Art. No. 101415-101423/
101426

Art. No. 101580-101590/
101408

Printer Lamps for Minilabs

High-quality halogen printer lamps with a very constant colour temperature and long service life. Printer lamps should be changed on a regular basis to avoid a weakening in the light intensity and associated colour disparities. Available for all common minilabs.

We will be pleased to send you a product overview on request.

Art. No. 101580 - 101590, 101408

Art. No. 350557

Art. No. 101460-101465

Leader Cards for Minilabs

Leader cards for various types of machines. We will be pleased to send you a product overview on request.

Art. No. 101460 - 101465

Gloves

Essential for prevention of fingerprints on e.g. negatives. These gloves are composed of 100 % cotton.

They minimise static charge and allow cleanly workings.

10 pair per item; Colour: white;

Sizes: S, M, L

Art. No. 101480 - 101482

Gloves
10 pair per item
Colour: white
Sizes: S, M, L
Art. No. 101480-101482

Spot Pen „Anti Red Eye“
Art. No. 101930

Spot Pen „Anti Red Eye“

Correction pen for colour papers to easily remove the „red eye effect“ in photos with a direct flash.

Simply dab lightly on the red spots, leave to dry, ready. Spot Pen ink penetrates the emulsion with no residues and is lightfast.

Even untrained persons find it quick and easy to use.

Art. No. 101930
